DynaMed®

Trusted by organisations in Australia & worldwide

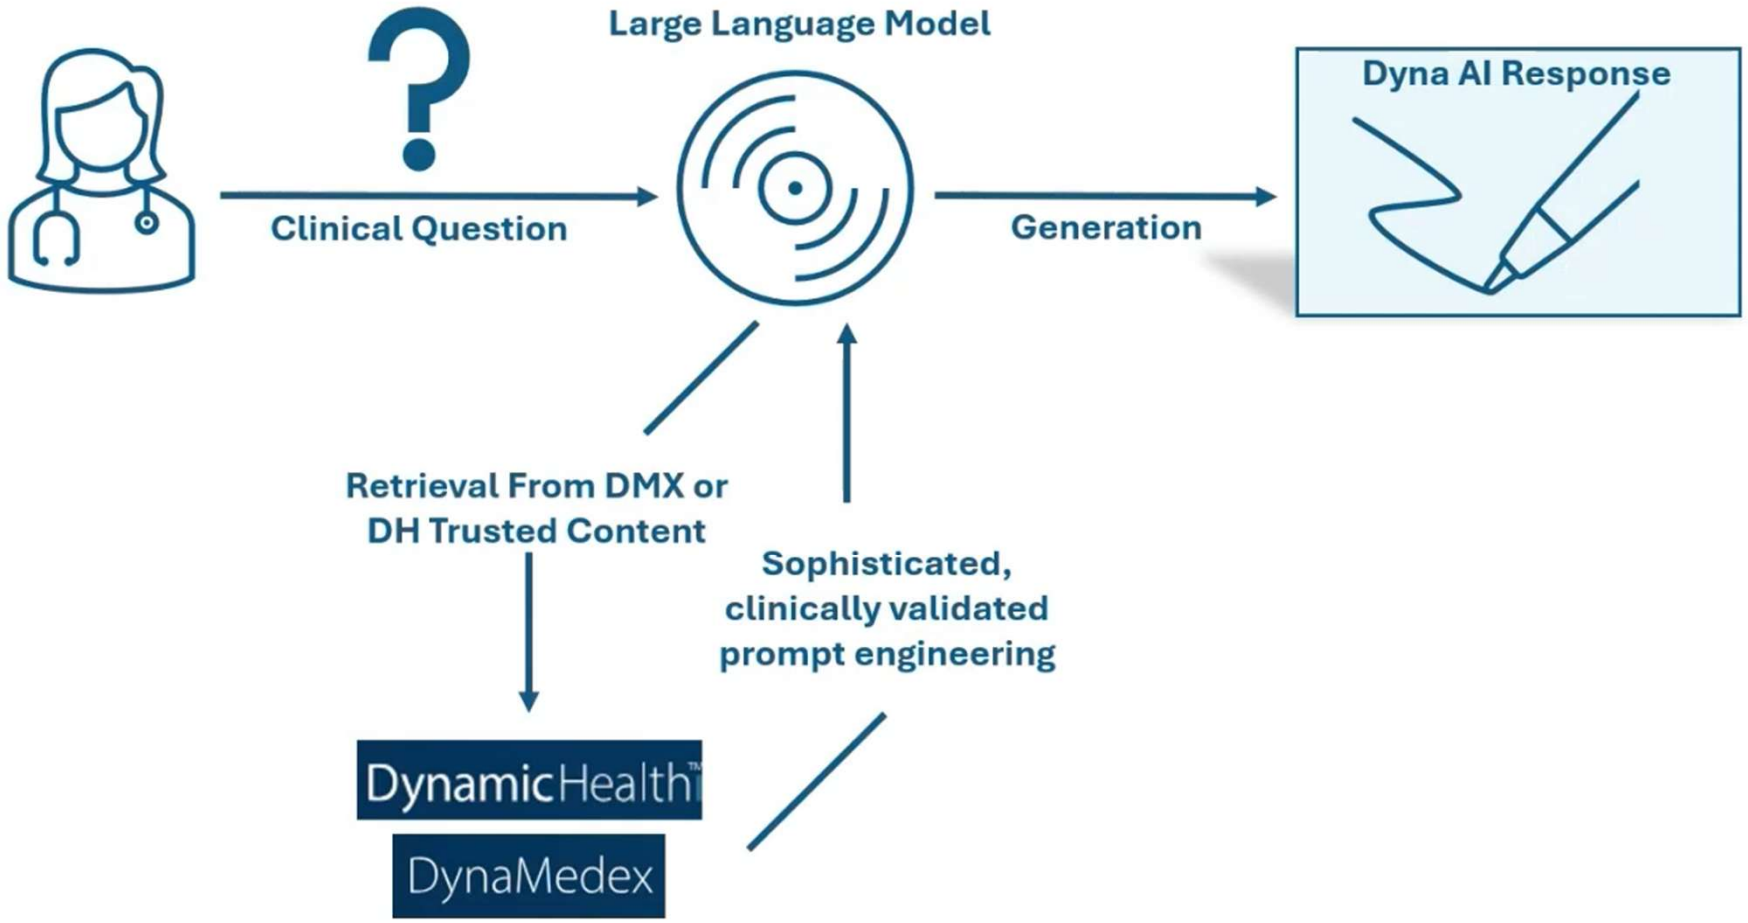

The DynaMed mission

To bring clinicians world-class, evidence-based drug and disease information, in an integrated solution at the point of care, providing fast and actionable answers to clinical questions.

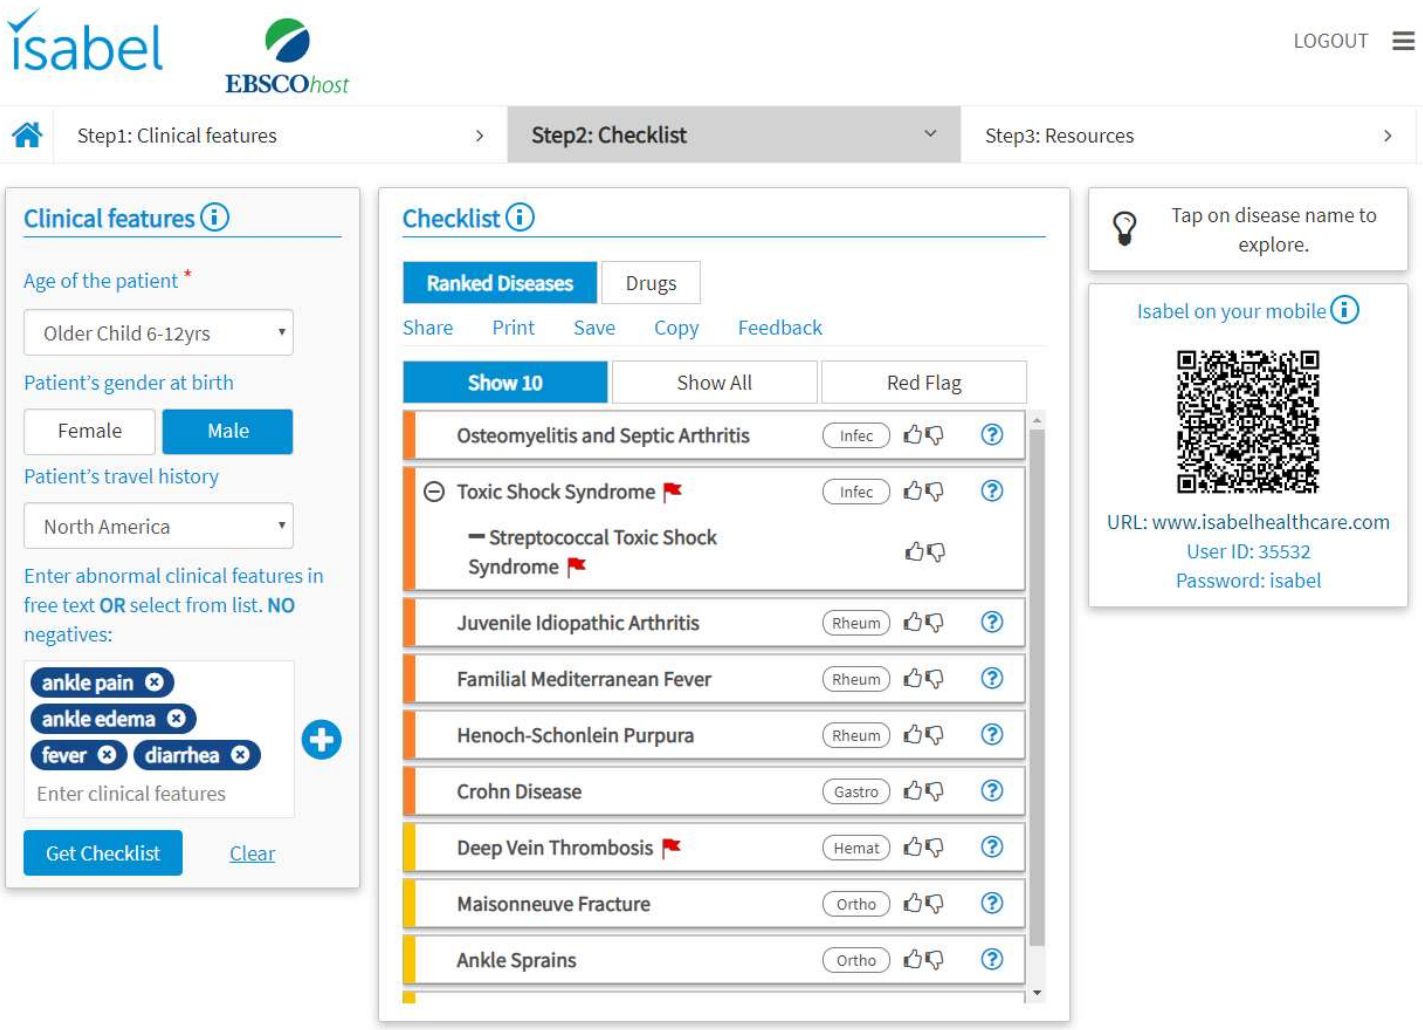

Dyna AI Retrieval Augmented Generation

What is Isabel?

- A web-based diagnosis checklist tool that helps clinicians broaden their differential diagnosis at the point of care
- Evaluates patient demographics, signs, and symptoms to generate a list of potential diagnoses
- Takes special care to highlight time-sensitive, potentially severe or fatal, “Don't Miss Diagnoses
